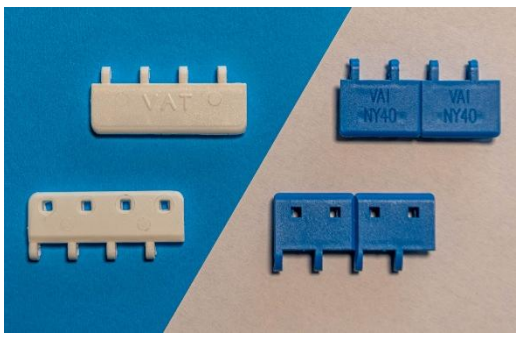
NY 30 - NY 40 TYPE VAT FASTENERS

The NY fasteners are made of Nylon PA 6.6 and are ideal for handling food products with PVC or PU belts, especially in the case of inclined transport.

They are the best polystyrene mesh joining system for processing fruit and vegetables. Their ease of use enables processing directly on the belt and, in the presence of wide and bulky belts, they are a more convenient solution compared to other options.

They consist of modular elements that can be fixed to the perforated belt by means of a simple interlocking clip and allow belts with multiple width of 25 mm (NY 40) or 50 mm (NY 30) to be fastened to each other.



Technical Data	NY 30 LB	NY 40 LB
Suitable for food	YES	
Use with metal detector	YES	
Resistance to UV rays	Poor	
Abrasion resistance	Excellent	
Operating temperature C°	-30°C + 90°C	
Width of modular elements (mm)	50	25
Thickness of belt to be coupled (mm)	1,5 - 2,5	2,0 - 4,0
Minimum diameter of the cylinders (mm)	50	70
Maximum workload (N/mm)	15	18
Connecting rod material	Nylon	
Connecting rod diameter (mm)	2,4 / 2	1,5 / 1,8
Colour (W=White LB=Light Blue)	W / LB	LB
